LOCAL HOME MANUFACTURER HONORED BY NATIONAL AWARDS PROGRAM

For immediate release: November 20, 2014

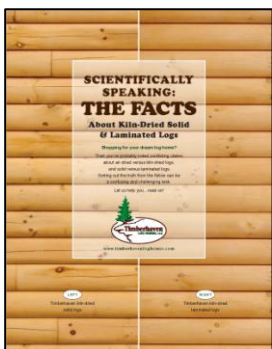

Lewisburg, PA: Lewisburg-based log home manufacturer, Timberhaven Log Homes, received a national home building accolade as part of the 2015 Jerry Rouleau Awards for Excellence in Marketing and Home Design presented by the Building Systems Councils (BSC) and the Log and Timber Homes Council, part of the National Association of Home Builders (NAHB). Timberhaven Log Homes was honored on October 27, 2014, during the BSC's "Showcase24," the only national conference and educational event focused exclusively on the systems-built industry.

For more than a decade, the BSC's awards program has promoted excellence in systems-built housing. Front runners in the industry are honored at the annual awards presentation for their innovative marketing strategies and unique systems-built housing designs.

"Winners of this year's awards did a phenomenal job of showcasing the best marketing and home designs in the building systems industry," said 2014 BSC chairman, Jason Blenker of Blenker Building Systems, in Amherst, Wis. "Systems-built technology is the building of the future and these awards represent what is possible for potential systems-built home owners."

The annual Jerry Rouleau Awards for Excellence are judged by an independent panel of industry experts, and companies like Timberhaven Log Homes were praised for the quality of their submittals. Recipients were recognized for excellence in achievement in a range of categories such as informative and aesthetically-pleasing websites, along with floor plan designs categorized by systems-built type and square footage.

"We are elated recipients of the national *Consumer Brochure of the Year* award," says Joe Folker, principal at Timberhaven Log Homes. "Our brochure, *Scientifically Speaking: The Facts About Kiln-Dried Solid and Laminated Logs*, provides factual information, substantiated by scientific experts, that illustrates the importance of utilizing kiln-dried solid and laminated wood components in log home construction. This brochure has already proven to be a resourceful tool for our consumers."

Select projects will be displayed on the BSC Awards Wall during the 2015 International Builders' Show in Las Vegas, January 20 -22, 2015.

For a complete list of award winning companies, as well as winners and projects from previous years' competitions, visit nahb.org/bscawards2015

ABOUT THE BSC: The Building Systems Councils of the National Association of Home Builders is made up of manufacturer, builder, and associate members who advocate building with concrete, log, modular, or panelized systems. Systems-built homes are constructed to the same code standards and reflect the same, and often enhanced, quality levels as any site-built construction. The advantage of systems-building is it's done in a fraction of the time, with a fraction of the waste, which can significantly reduce costs. Many systems-built homes also are inherently environmentally friendly adding a "green" label to the finished home.

ABOUT NAHB: ABOUT NAHB: The National Association of Home Builders is a Washington-based trade association representing more than 140,000 members involved in home building, remodeling, multifamily construction, property management, subcontracting, design, housing finance, building product manufacturing and other aspects of residential and light commercial construction. NAHB is affiliated with 800 state and local home builders associations around the country. NAHB's builder members will construct about 80 percent of the new housing units projected for this year.
