

# 6x12 LOG PROFILES

SINGLE  
NOTCH

DOUBLE  
NOTCH

V-GROOVE

## A. CORNER OPTIONS

- All 6x12 profiles are available with the following corner options. (6x12 logs are not available with saddlenotch corners)
  - Mortise & Tenon
  - Dovetail
  - TrimNote: If a dovetail corner option is selected, all log sided areas will automatically receive trim corners.

## B. LOG SIDING SKIRT BOARD

- The following corner options receive (2) rows of log siding skirt board.
  - Mortise & Tenon
  - TrimNote: Siding skirt board not supplied below porches or decks.

## C. ALUMINUM SKIRT FLASHING

- The following corner options receive aluminum skirt flashing in lieu of log siding.
  - DovetailNote: Aluminum skirt flashing is provided to assist with weatherization and should be covered with an exterior finish such as stone.

**D. LOG STACK HEIGHT: (A) = 11 1/4"**

**E. LOG WIDTH: (B) = 5 1/2"**

**F. EXTERIOR WINDOW TRIM: 1 3/4" x 5 1/2"**

## G. PORCH

- The 6x8 header is typically located in the 8th course
- A porch roof typically has a 4/12 pitch.

## H. LOFT FLOOR

1. 6x8 loft joists are typically located in the 9th log course:
2. Dimension from the top of subfloor to bottom of 6x8 loft joist = 7'-9 1/2"
3. Dimension from the top of subfloor to bottom of loft floor = 8'-4 3/4"
4. Dimension from the top of subfloor to top of loft floor = 8'-6 1/4"

## I. TYPICAL COURSE TO SQUARE *(Stack heights noted allow for 1/2" notch removed from the 1st log course)*

1. Pre-fab truss roof systems are typically 9 courses to square (8'-4 3/4" stack height).
2. 2x12 rafter roof systems are typically 10 courses to square (9'-4" stack height).
3. Beam & purlin roof systems are typically 10 courses to square (9'-4" stack height).
4. 6x8 rafter roof systems are typically 10 courses to square (9'-4" stack height).
5. Round rafter roof systems are typically 10 courses to square (9'-4" stack height).
6. Dormers are typically 18 courses to square (16'-10" stack height).
7. Full two stories are typically 18 courses to square (16'-10" stack height)
